

CURRICULUM VITAE

I have experience in the hospitality industry, however, my true passion has always been in programming and development, and I have strong attention to detail and inclination for problem-solving. To build upon this interest, I have graduated from a Coding Traineeship as a full stack developer. Upon graduation, I have worked as a freelance software developer creating and updating web applications and websites for clients. I have real-world experience developing websites and applications, excellent customer service, communication, teamwork and organisation skills and a strong work ethic. I am looking forward to establishing a career in the development field where I can prove myself as an asset.

CODING TRAINEESHIP

IT Career Switch Ltd
Coding Traineeship – Full stack developer
1-year program

During the traineeship I had to demonstrate a very competent level of the following programming languages and technical skills

- HTML5, CSS3, JavaScript
- PHP, SQL, React, jQuery
- Python, Node.js, Bootstrap
- Tailwind CSS, Command line Git, Github
- Remote API access

ADDITIONAL TECHNOLOGIES:

- Express.js, MySQL, MongoDB

FREELANCE EXPERIENCE:

Since December 2023 I have been freelancing on Upwork.com. More details of my freelance work can be found on my Upwork profile below:

<https://www.upwork.com/freelancers/~0187be7100cd5c9eef>

DEVELOPMENT EXPERIENCE:

Below are the projects I have completed, additional information on these projects can be found in my portfolio:
<https://mikejprushton.com/>

Portfolio Project #1: "Rush-Eats"

A full-stack MERN food-ordering platform designed with typescript. This application is fully responsive in all screen sizes. Utilises TanStack query for handling api requests and Zod for form-handling. Payment is secure using Stripe in development mode. Backend uses Node.js and Express.js to connect to a MongoDB database.

Portfolio Project #2: "Metropolis"

A full-stack e-commerce application. Users may filter and purchase products using PayPal Developer. Jsonwebtokens are utilised for login security. Redux is used for maintenance and storage of data. The app is fully responsive and declares a modern UI design.

Portfolio Project #3: "Rushton Properties"

A full-stack MERN application that uses React in the front-end and Express.js and Node.js in the back-end to connect to a database in MongoDB. This fully responsive application uses Firebase for google authentication. The application is completely error-free.

Additional projects and client websites I maintain can be found on my Upwork profile:
